

The
GEMINI
Effect

By

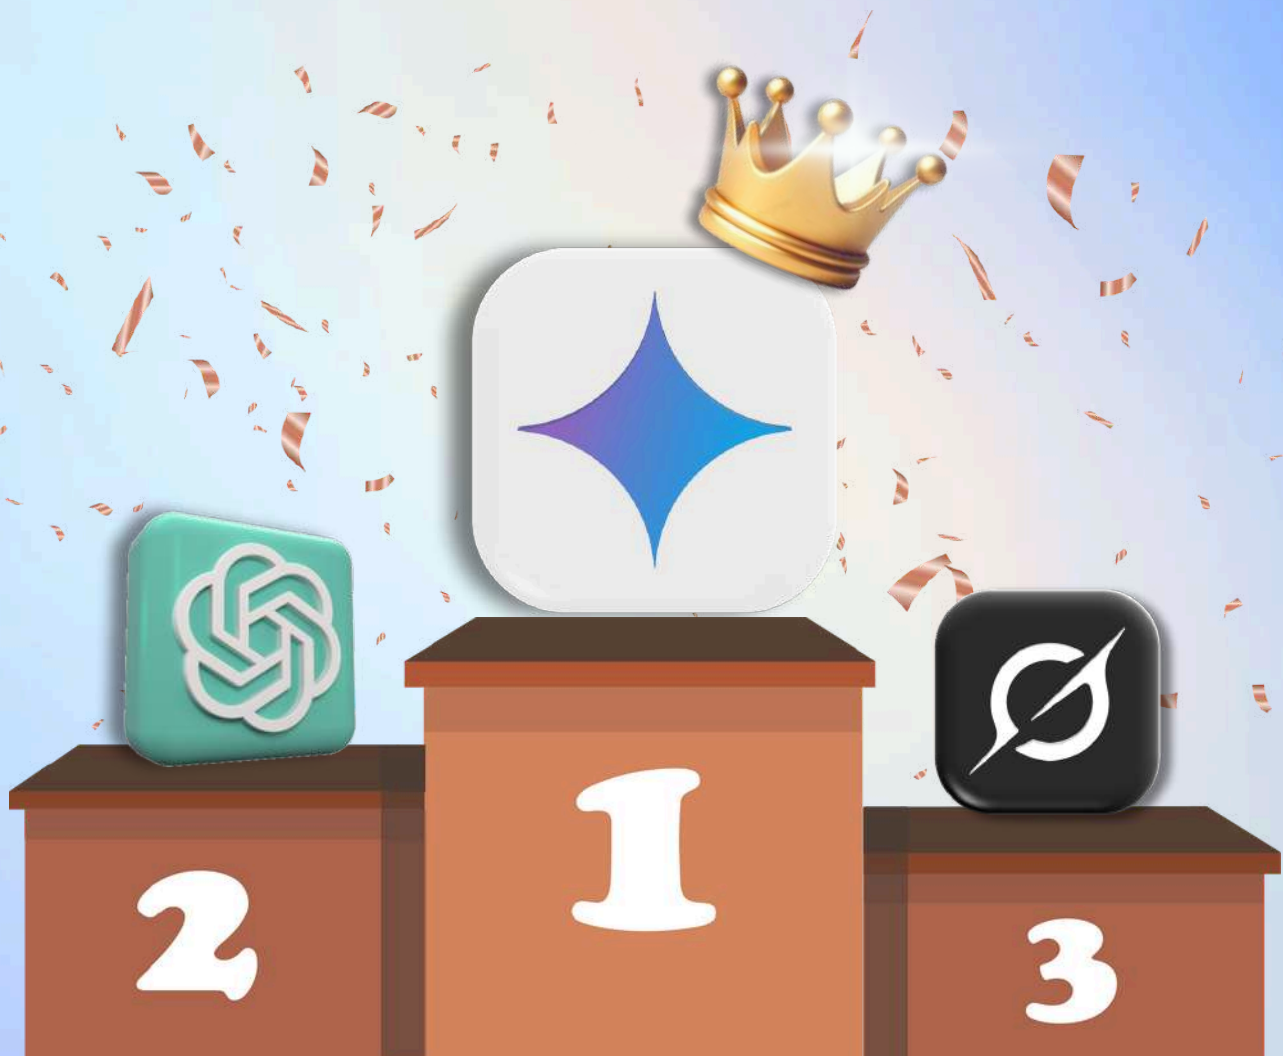

SUDIPTO DAS

ChatGPT

Yes, It helped a lot in assignments and online coding but now there's a new boss in town.

Google

GEMINI

But Why ?

Let's find out >>>

An Overview :

Gemini (formerly Bard) is Google's next-generation AI assistant built on the Gemini family of models.

It's multimodal, means it works with text, audio, video, document, image etc. Day by day google is working on it's all AI models and making it more "**think before answer**" and with **agentic AI** capabilities.

Alongside conversational chat, it can generate or edit images (via "Flash Image" / "Nano Banana"), animate photos into short video clips, and even act as a browser agent (click, fill forms) using "Computer Use" mode.

Why Exactly the ***Gemini Effect ?***

Because Gemini isn't just "a tool on which we chat", It's shaping how we expect AI assistants to behave: blending into devices, acting like a smart co-pilot, not a dumb query engine.

Why only Gemini ?

You can mix text, image, voice, video inputs & outputs seamlessly.

Multimodality

Mostly text + occasionally image

2.5 model “thinks” more before responding to any query.

Thinking Steps

Relies heavily on prompt engineering / chain-of-thought tricks

“Computer Use” model lets Gemini see your screen and act (click, fill forms)

Agentic AI

Some automations exist (via API wrappers). Manual work.

Gemini 2.5 Flash Image (a.k.a “Nano Banana”) supports ultra realistic edits, fusion of multiple images, prompt-based control.

Generative AI

Other models (Midjourney, Stable Diffusion, DALL·E) specialize in images but lack deeper conversational integration

Gemini supports memory features: remembers user preferences, context, past chats (with privacy control)

Memory

Some systems allow “memory” but often limited or temporary.

Built-in synergy with Gmail, Drive, Search, Maps, etc

Integration

Others integrate via third-party APIs. Again, manual hassle.

No doubt other AI models are great as well but Gemini out shines all of them due to it's high quality outputs and too realistic generative AI capabilities.

Also

Now as gemini is present in almost every device as their own AI assistant it can read your screen and give suggestions and will also help you out from complex tasks.

Using Google Gemini to your everyday life is like having a personal assistant who has answer to everything, even completes task on behalf of you (obviously in your device and not your manual tasks)

Gemini Integrations

Google has integrated it's Gemini model into various devices and platforms such as :

Devices :

Android phones, Google watch, Samsung galaxy watch, Google home smart speakers.

Softwares :

Google workspace (docs, sheets, gmail), Google home app, Gemini mobile app.

Others :

Google gemini assistant (*replacing google assistant*)

Prompt Hacks in Gemini

Google's gemini models comes with in built thinking capability but still there is no debate that your one good prompt can influence your results. It will go either way high or bare minimum low.

So, from the next time whenever you are using gemini, use these prompting hacks for much better results.

Before :

Write an article on remote work

Okk, it's good...

But let's make it better

You are a trend analyst. Write a 1,200-word article on the future of remote work (2025–2030). Structure: intro, 3 trend forecasts, 3 risks, conclusion. Use bullet lists, cite 3 recent studies, and include an illustrative infographic idea (describe it).

Check out more creative and unique prompt ideas for maximum productivity

Prompt Sheet #1

Before :

Explain the topic Quantum Computing

After :

You are my personal tutor. Explain Quantum Computing like I'm in my second year of college — use real-world analogies, short diagrams in text form, and end with 3 fun quiz questions I can test myself with.

Before :

Write an email to my boss about project delay

After :

Write a professional yet empathetic email to my manager about a 3-day project delay due to client feedback. Maintain a calm tone, include 2 proposed solutions, and end with a confident reassurance line

Before :

Explain how a motor works

After :

Explain how a DC motor works in a simple way, but also describe the parts, wiring diagram, and how to troubleshoot common motor issues. Write it like a quick repair guide

Prompt Sheet #2

Before :

Plan a trip from Delhi to Manali.

After :

Create a 5-day Delhi-to-Manali travel plan with driving distances, scenic pit stops, local food spots, and alternate routes in case of traffic. Include one line 'local driver tip' for each day

Before :

Give me video ideas for my next vlog.

After :

Give me 5 viral vlog ideas for a solo traveler channel. Include video titles, short description, shooting style (camera angles, transitions), and trending background music suggestions for each.

Before :

Design a logo for my brand

After :

Create 3 logo ideas for a minimal fashion brand called Velvo. Use color palette of sea green with off white. Keep the shapes as triangle and add a letter V in the logo.

Scenario Examples

Here are some different scenarios and also their prompts which you can use for better responses and better productivity.

Scenario 1 :

Final exams are coming, and you need to revise multiple subjects fast.

Prompt :

Gemini, act as my study buddy. Create a 3-day revision plan for Physics, Chemistry, and Math. Include 2 high-weight topics per subject and quick recall summaries

Scenario 2 :

You need to create a fun classroom quiz for your students

Prompt :

Generate 20 quiz questions on Northern plains (mix MCQs & True/False). Include answers and a short fact I can tell students after each question

Scenario 3 :

You're debugging a tricky piece of code for your manager but you need it accurate.

Prompt :

Here's my Python code. Find the bug, explain what's wrong, and rewrite only the faulty part. Add 2 lines of logging to help me debug next time.

Scenario 4 :

You're planning a solo trip to Europe with limited budget.

Prompt :

Plan a 10-day solo Europe trip under \$1,200. Pick 3 countries, budget hostels, must-visit local cafes, and free walking tours

Scenario 5 :

You want to pitch your new app idea to investors.

Prompt :

Write a 2-minute investor pitch script for my app 'EcoSmart' that tracks home electricity use. Make it persuasive, simple, and end with a one-line impact statement

Scenario 6 :

You are a school student and have to submit a creative English project.

Prompt :

Write a short story (150 words) about kindness that sounds like written by a school kid. Add a moral line and 2 emoji suggestions for my poster

Scenario 7 :

You have to summarize 5 long emails into one actionable note.

Prompt :

Summarize these 5 emails into one clear update with 3 action items and responsible people. Format it for my boss.

Scenario 8 :

You need a quick fitness plan for office workers

Prompt :

Design a 15-minute daily desk workout plan for office employees. Include warm-up, stretch, strength moves, and hydration tips

Be more creative and try out new prompt ideas for more effective results. The more descriptive your prompt will be, the more better results you will get.

AI isn't here to replace you, it's here to multiply it.
